## IN THE CLAIMS:

Please amend claims 1, 3, 7, 14, and 15 as follow:

1. (Twice Amended) An advertising system comprising:
a content provider [which generates] to generate ad banners;
a target computer [which receives] to receive the ad banners;
[an] a collecting agent which is transmitted from the content provider to the
target computer[, the agent obtains] to obtain user information including data for a
hardware profile and [transmits] to transmit the user information to the content
provider; [and]
a triggering agent to discern the user information obtained by the collecting
agent and determine whether the user information is significant; and
a program running on the content provider, the program organizes the user
information and updates a user specific database.
3. (Twice Amended) The advertising system of claim 1 further comprising a
baseline user profile including the hardware profile which is updated by the
program running on the [contact] content provider.
7. (Twice Amended) A method of communicating advertising information
comprising the operations of:
creating a user profile;
transmitting an ad banner from a content provider to a target computer;
collecting user information at the target computer including data for a
